

## SBT (Scan Based Trading) Discard

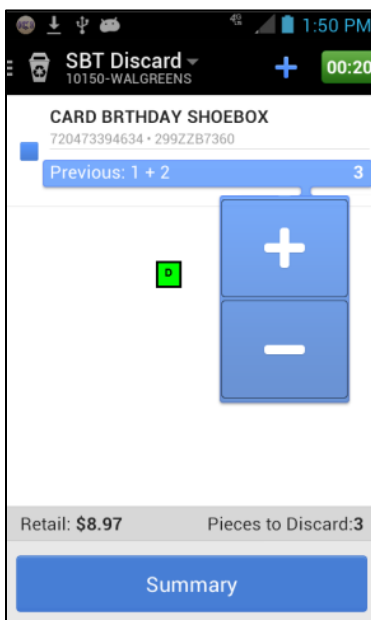

**SBT Discard** enables you to scan Everyday and Seasonal items to remove them from the store inventory.

- A. Open **SBT Discard**.
- B. Begin **scanning** product.

A **list of product scanned** will be created with the last scanned item at the top. If **duplicate UPCs** and quantities are **entered at different times**, there will be an entry for both inputs along with a total for that UPC.

When the user scans a product, an **overlay appears** allowing them to **increase/decrease the quantity** amount quickly.

After 15 seconds of inactivity the overlay automatically fades away. It can also be dismissed by tapping in the gray area.

In **Settings**, the overlay can be **moved** to the other side of the screen to accommodate left handed users.

The unit will go into continuous scan mode after pressing the scan button once while scanning a UPC.

Summary

- To **add product** by **UPC**, tap on the **+** sign in the upper right corner.
- Use the keyboard to type in the **entire UPC #** including the **supplemental**.
- Tap on **Add**.
- Use the **+/- picker** to adjust the quantity.
- If **duplicate UPCs** and quantities are entered at different times, there will be an entry for both inputs along with a **total** for that UPC.

UPCs **not recognized** can still be entered and will show up as **Unknown Product** in the list.
